

CITROËN

Connected vehicles

The new era of driving

Join the connected car revolution. A new level of safety, convenience and entertainment on the road awaits you.

And make...

1 YOUR DRIVE SAFER

Experience peace of mind on every journey with Citroën's connected vehicles and receive support in case of emergency.

2 YOUR LIFE EASIER

Say goodbye to traditional vehicle management hassles. Monitor your car off board wherever you are with a few taps on your smartphone. When on board, get real-time information of your surroundings.

3 YOUR TRIP EXCITING

Turn every journey into an adventure with various on-board entertainment options and vocal assistants.

Embedded connectivity

Your Citroën is not just a car. You can now manage it like a smartphone.

An in-built telematic box enables the following functions...

Internet connection via SIM card to manage your vehicle remotely.

Storage of the communication with your vehicle via cloud.

Over The Air Software Updates to always keep your vehicle up to date.

Localisation of your vehicle and support in case of need, thanks to embedded GPS.

Is your car really connected?

On-board Bluetooth, hotspot tethering or mirroring can only offer you limited connectivity.

BLUETOOTH

To pair your car with your smartphone just to share its audio.

TETHERING

To have a temporarily connected car, using your smartphone internet data.

MIRRORING

To use Apple Car Play/Android auto™ and use your smartphone apps on your car.

Expand your possibilities and drive into the future with a true connected vehicle!

A vehicle equipped with a telematic box gives you all the advantages of real connectivity.

Connectivity always starts with the MyCITROËN app.

Download it and begin your connected journey.
